BIG FAMILIES WITH BIG HOT WATER DEMANDS

Boost to 100 Gallons in Heat+ Mode to Achieve up to 7 Back-to-Back Showers

ULTIMATE CONTROL AT HOME & AWAY

Pair your EXR with the MyEssency app for customized and precision control of energy and water usage, remote monitoring, and ultimate peace of mind.

BOOST FUNCTION

Instead of Heat+ Mode for 100g all the time, use Boost Mode for short periods when you need 100g for just a few hours or days.

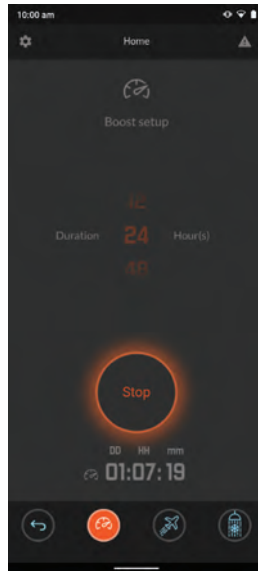

WATER SAVER

Limit hot water for overindulgent users while conserving energy and water. Activate to turn water cold for up to 30 minutes at a time.

VACATION MODE

Saves energy while preventing water from freezing. In this mode, only the low heating element is used to keep the tank at a minimum fixed temperature. This mode can be programmed by the user for a fixed duration in days or for an infinite period of time.

ALWAYS ENOUGH TO GO AROUND

FOR HIGH-DEMAND, HIGH-CAPACITY HOMES

"I replaced two 40-gallon heaters with one Essency and got the same output. My wife has been trying to run out of hot water ever since and hasn't been able to do it. I love this thing."

- Chris Bare, Owner, Bare Tech Plumbing Inc, Wilmington, NC

ESSENCY IS BEST IN CLASS

Likely zero infrastructure upgrade costs with a 20-year leak-free guarantee. At 100 pounds, it's easy to replace the old one.

DOUBLE-WALL POLYMER TANK LASTS
3X LONGER
THAN METAL WATER HEATERS

Industry-leading First Hour Rating. Hot water is more consistent and lasts longer. It's easy to activate "Heat+" Mode with the flip of a switch for 100g equivalent.
